

Evanco Environmental Technologies, Inc.

12750 Jefferson Davis Hwy #362
Chester, Virginia 23831
United States

Phone: (800) 267-9810

Evanco Environmental, based in Richmond, Virginia, provides pipeline assessment, designing solutions that will extend asset life by monitoring or rehabilitation, and fabrication/installation of trenchless designs. The company provides proactive maintenance for aging pipelines that are at risk of deterioration, corrosion, blockages, collapses, and bursts. Evanco has developed techniques, equipment, and reporting protocols to properly clean and inspect sewers without disrupting production and operation. It also provides water and sewer rehabilitation repairing and rehabilitating services for pressure and gravity pipelines. The company has also reviewed and managed the work of others in this specialty field and assisted general engineering companies with their expertise in trenchless design and selection.
