Perma-Liner Industries, a Waterline Renewal Technologies (WRT) brand, is a leading manufacturer and supplier of trenchless pipeline rehabilitation equipment & materials in North America. Since 1999 PLI has developed systems to rehabilitate existing sewer systems without excavation. Based on the design of the equipment and materials, PLI can offer compact, user-friendly systems. Little to no digging is involved in this trenchless process, making for a potentially more cost-effective and less disruptive method than traditional "dig and replace" pipe repair methods. Perma-Liner Industries provides complete turn-key Trailer or Truck Build-Out Packages, Certification/Training, Technical Support, Marketing Support, and Specification & Design Support.
