Fax: (407) 425-1569

CUES, Inc. manufactures pipeline inspection and rehabilitation equipment, including pipe profiling equipment and pipeline inspection/asset management software for sanitary and storm sewers, industrial process lines, and water lines. Headquartered in Orlando, Florida, CUES proudly offers innovative no-dig sewer line solutions for efficient and reliable pipeline repair. CUES' latest GROUT/REHABILITATION product line, CUES LOCK, includes structural point repair systems designed for stand-alone spot repairs or to enhance the quality and simplicity of cured-in-place relining. In addition to inspection equipment, CUES also makes lateral reinstatement cutting systems that enable reinstating laterals in mainline sewers after they have been relined with a wide variety of liner materials. Pipe profiling is accomplished via Laser or Sonar-based systems. CUES provides the broadest product line to assure its customers can meet today's varied and stringent inspection and regulatory requirements regardless of pipe size, material, or inspection conditions.
