Great Lakes Trenchless Association (GLTA), in Dayton, Ohio, represents trenchless technology professionals throughout the Great Lakes region. The GLTA was formed to meet the needs of the growing trenchless industry. Its mission is to enhance the skills and credibility of all Horizontal Directional Drillers and Underground Trenchless Construction Professionals, develop and exchange industry knowledge, and to promote trenchless methods and the understanding of its benefits. Now with force in numbers a forum is in place to tackle the problems that arise. This association supports Ohio directional drillers and those in support of their interests.
