United Kingdom Society for Trenchless Technology (UKSTT) is a not-for-profit organization involved in the development and promotion of Trenchless techniques, sometimes termed No-Dig techniques. UKSTT was formed in 1993 and incorporated the existing UK based members of ISTT. Trenchless Technology is increasingly accepted worldwide as being more efficient, less disruptive, environmentally friendly and more cost effective than traditional methods. Information on the Techniques can be viewed in the technologies section of their website.
