

# Pipe Jacking Association

---

10 Greycoat Place  
Westminster, London, England SW1P 1SB  
United Kingdom

Phone: 0845 0705201

The Pipe Jacking Association represents the leading contractors, pipe suppliers, machinery manufacturers, consultants and other suppliers in the United Kingdom pipe jacking and microtunnelling industry. The Association is dedicated to best practice for the cost effective and environmentally sensitive installation of utility services underground. The PJA provides:

- Detailed design advisory publications based on industry best practice
- Case studies covering a range of applications and typical carbon savings
- CPD lectures for clients and design teams
- Presentations and animations to explain the technology
- Research at leading universities and student teaching resources
- Carbon calculator demonstrating carbon savings of non-disruptive

methods Membership of the Association is for well-established companies registered in the UK who are in business as pipe jacking and/or microtunnelling contractors, manufacturers of pipe jacking machinery and equipment, pipe manufacturers, consulting engineers and specialist suppliers to the pipe jacking industry. Overseas companies are also eligible to join the Association in each of the above categories, with limited participation rights. Further details can be obtained from the Association's secretary.
