1468 West Hospital Road
Paoli, Indiana 47454
United States

Phone: (812) 723-0704

Inliner Technologies, LLC is a leading U.S. cured-in-place pipe (CIPP) technology company headquartered in Paoli, Indiana. Inliner offers municipal and industrial clients looking for safe, cost-effective, and long-term pipeline solutions a uniquely superior product and installation method. Inliner's licensees are contracted by municipalities and manufacturing-based industrial facilities to renew storm, waste and process sewer piping that have been damaged by corrosion and/or structural deterioration. CIPP technology allows for the renewal of damaged underground pipes without excavation. Inliner® Cured-in-Place pipe (CIPP) product has been used throughout the U.S. and Canada to protect, seal and renew over 20 million feet of sanitary, storm and industrial process piping.
