Located in Ottawa, Illinois, LMK Technologies is a manufacturer and technology provider of cured-in-place pipe (CIPP) systems for the trenchless rehabilitation of sewers without digging. Products manufactured by LMK are made in the United States of America. LMK Technologies, a Waterline Renewal Technologies brand, has been a trenchless Cured-In-Place-Pipe (CIPP) lining leader since 1993. Many municipalities and engineering firms recognize LMK as the innovative leader for the trenchless renewal of sewer laterals, mainline, and manholes. In its relatively small lifespan as a company, LMK has invested time and resources in research and development, continually improving existing technology. As a manufacturer and technology provider, LMK Technologies offer contractors everything they need to succeed in the trenchless CIPP rehabilitation business. Many municipalities and engineering firms recognize LMK as the innovative leader for the trenchless renewal of sewer laterals, mainline, and manholes. Specializing in main-to-lateral CIPP lining, LMK's ASTM F2561 compliant T-Liner® is a one-piece homogenous connection liner that renews 18-inches 360-degrees of the mainline and extends up the lateral pipe as one continuous lining.
