TT Technologies complete line of trenchless equipment includes: piercing tools, guided boring tools, pneumatic, static and lateral pipe bursting systems, pipe ramming tools, bentonite mixing systems, constant-tension winches, directional drills, and mini-directional drill rigs. Contractors and municipalities alike benefit from TT Technologies tools that feature low maintenance, high reliability, with proven accuracy and profitability. Aging infrastructure including gas, water, sewer, telephone, and electrical lines and services are repaired or replaced daily using TT Technologies equipment. A nationwide network of regional customer service offices and distribution locations assures products and expertise are always nearby. Comprehensive hands-on training seminars are held at the corporate offices in Aurora, IL as well as regional shows, workshops, and demonstrations throughout North America each year.
