Alpha Pipeline Integrity Services, Inc., in Kemah, Texas, provides pipeline-related services, including tracer gas leak detection for effectively pinpointing small, non-surfacing leaks in buried pipelines. Finding leaks in process equipment such as exchangers & coolers, designing and installing cathodic protection systems, external & internal direct assessment surveys to precisely find coating defects and anomalies, and electronic buried line location. Pipeline pig tracking uses the latest electromagnetic technology, ultrasonic equipment, tank testing, non-metallic pipeline repair, and ultrasonic leak detection on land and water. Alpha Pipeline Integrity Services also offers electronic buried line location, pig tracking and locating, and non-metallic pipeline repair system (Diamond Wrap™) installation.
